

We think everyone should be cool

Project

When Grants were asked by a reputable construction company to assist in designing a shading system for these two private houses in Mudeford, they knew that only a carefully engineered product would cope with the high demands of the large curved glazing that was such an integral part of the design.

Solution

Grants shading offered a curtain track system that followed the curved glazing to the exact radii. Integration to the Home Automation system was paramount for the client to ensure total flexibility in control wherever he was in the world.

Specification

17 x Endurashade Automated Curtain track system, custom curved with Home Automation Integration facility .
